

**Márta Nagy-Rothengass**  
**Head of Unit**  
**European Commission**

Márta has broad working experience Europe wide in business and public environment. She dealt with initiation and transaction of trade agreements, taught Business Studies, managed social association and did consultancy work. She gathered her interest on ICT while establishing "New Media" by a traditional German manufacturing company.

In 2005 Márta joined the EC as the Head of Unit of "ICT for the Environment" in DG INFSO and developed her Unit further to "ICT for Sustainable Growth" linked to the integrated climate and energy policy. After her move to Luxembourg in 2008 she served as Head of Unit "Technologies for Information Management" with focus on research and development funding of innovative ICT technologies supporting the creation of intelligent digital objects and knowledge management, later on the efficient management of extremely large scale data including Open Data. Since July 2012 she is in charge of the Data Value Chain Unit and builds up on a strategy to extract the maximum value from data by building on the intelligent use of data sources across the European Union and beyond. She was deeply involved into the EC Communication "Towards a thriving data-driven economy" and is a driving force in the work towards a European Public Private Partnership on "Big Data Value"
