

**Roberto Sanz-Requena**  
**Biomedical Engineer**  
**Grupo Hospitalario Quirón**

Roberto Sanz-Requena (Valencia, 1981), PhD, is biomedical engineer at the R&D Department of Grupo Hospitalario Quirón, the largest private hospital group in Spain, since 2006.

His main interests are the innovation of healthcare workflows through the incorporation of computational sciences and IT solutions, especially in the field of medical imaging. He has authored or co-authored more than 30 scientific publications in this field and contributed in more than 100 congress communications.

In 2013 he joined the European project CocoCloud (Confidential and Compliant Clouds) as technical responsible of the eHealth pilot, focused on the design and implementation of a cloud-based radiological portal for doctors and patients.
