

Dr Stefan Roehrich
IT-Security Specialist
ROHDE & SCHWARZ SIT

From 2003 to 2007, Mr. Roehrich worked at European Institute for Systems Security at the University of Karlsruhe in the field of cryptographic protocols, e.g. development of the cryptographic voting protocol "Bingo Voting" (which won the German IT security price 2008), secure handling of digital signatures and more. Since 2008, Mr. Roehrich has been working at Rohde & Schwarz SIT GmbH in Berlin. His main working fields are secure design of cryptographic devices and modules and to make their security evaluable.
