

Building up an Eco-system Governance for individual entities

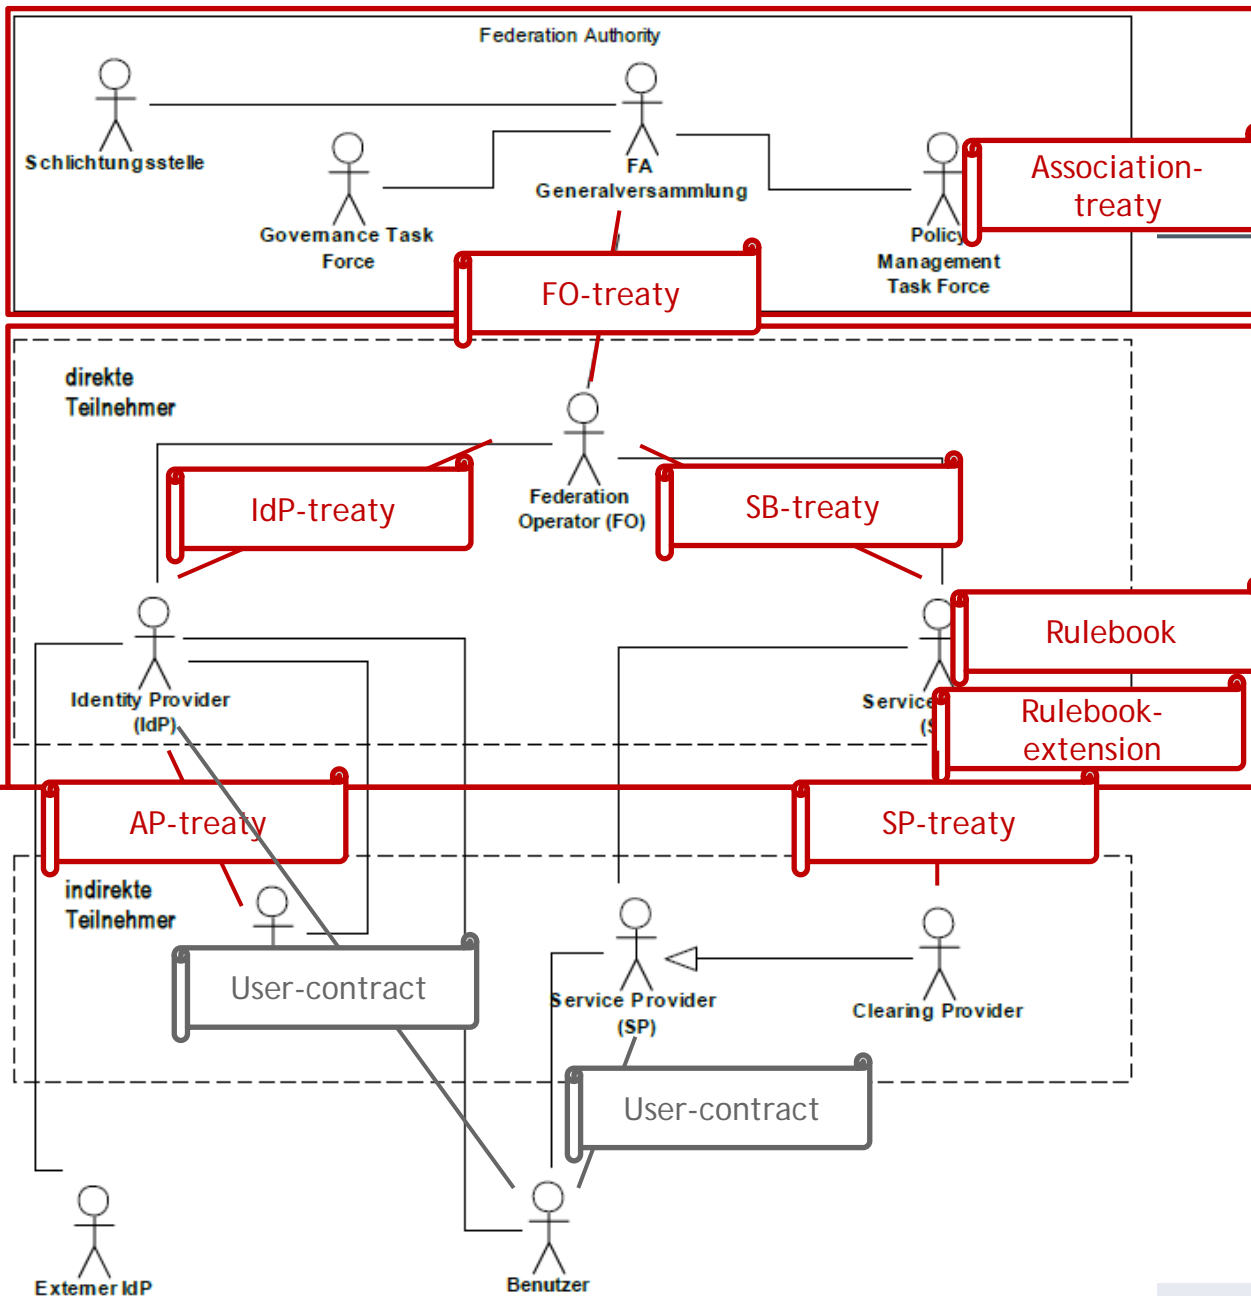

Gerhard Laga
Austrian Federal Economic Chamber

Relevant legal fields to be enforced

- Privacy (by design)
- E-Commerce Law
- Contract Law
- individual risk management

Contracts vs rulebook

- Individual contracts get to complex soon -> Rulebook necessary to create a level playing field for all
- Transparent regulations lay the basis for all federations.
- Harmonised roles across all federations.
- Individual extensions (but no contradictions!) for each federation possible.

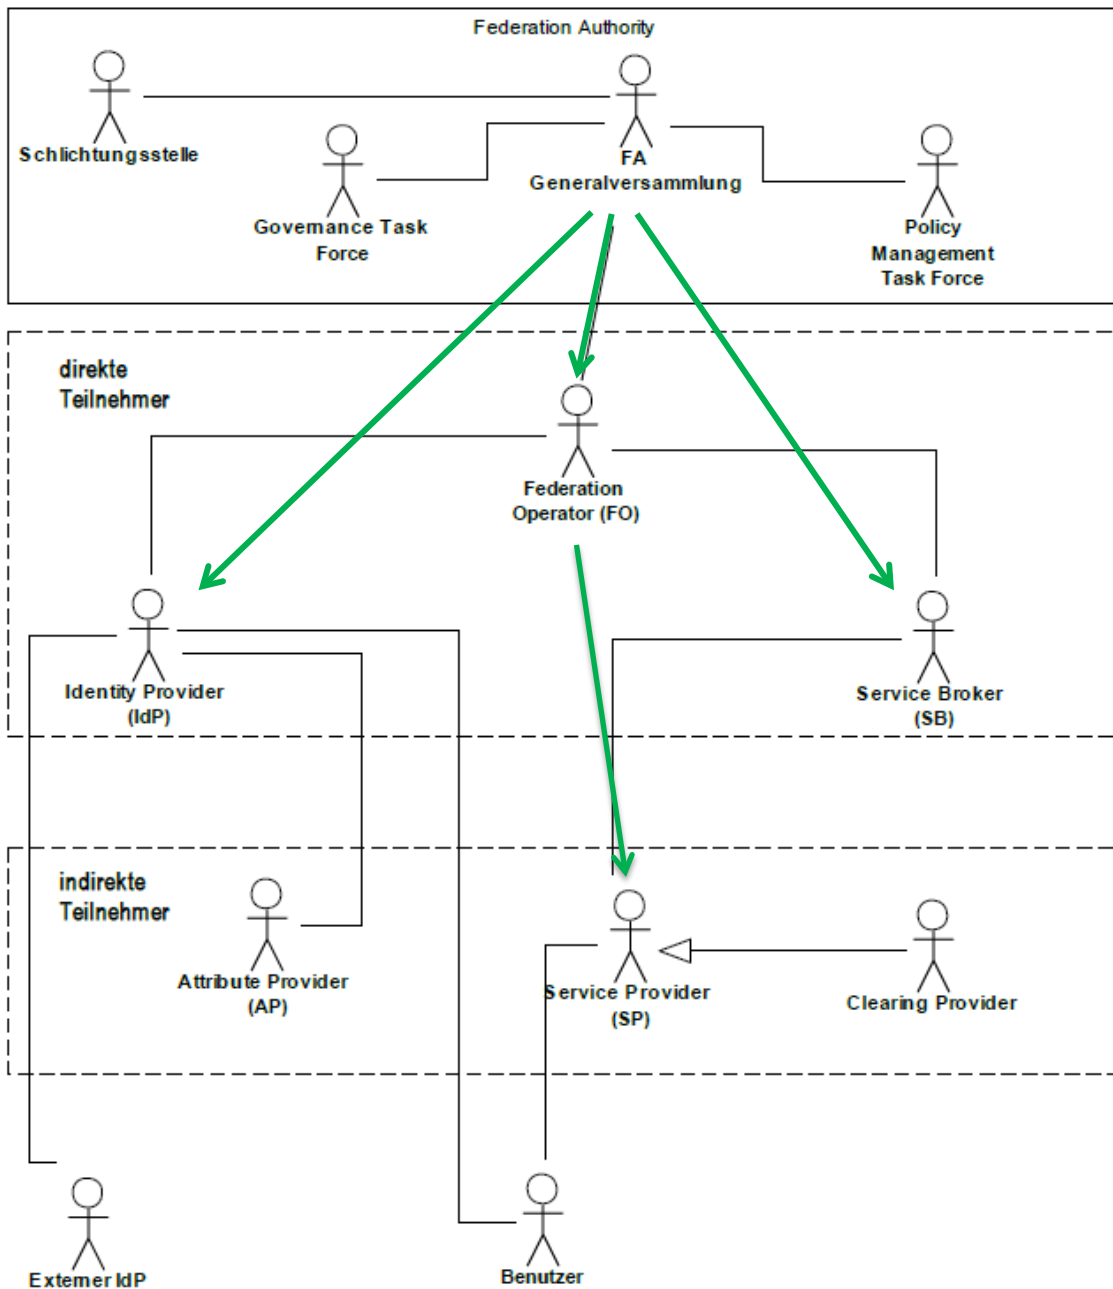

Legal works

- Governance-rules (association-treaty, statues etc)
- Rulebook
- Rulebook-extension on federation level
- FO-treaty
- IdP-treaty
- SB-treaty
- SP-treaty
- AP-treaty
- User-contracts (individual)

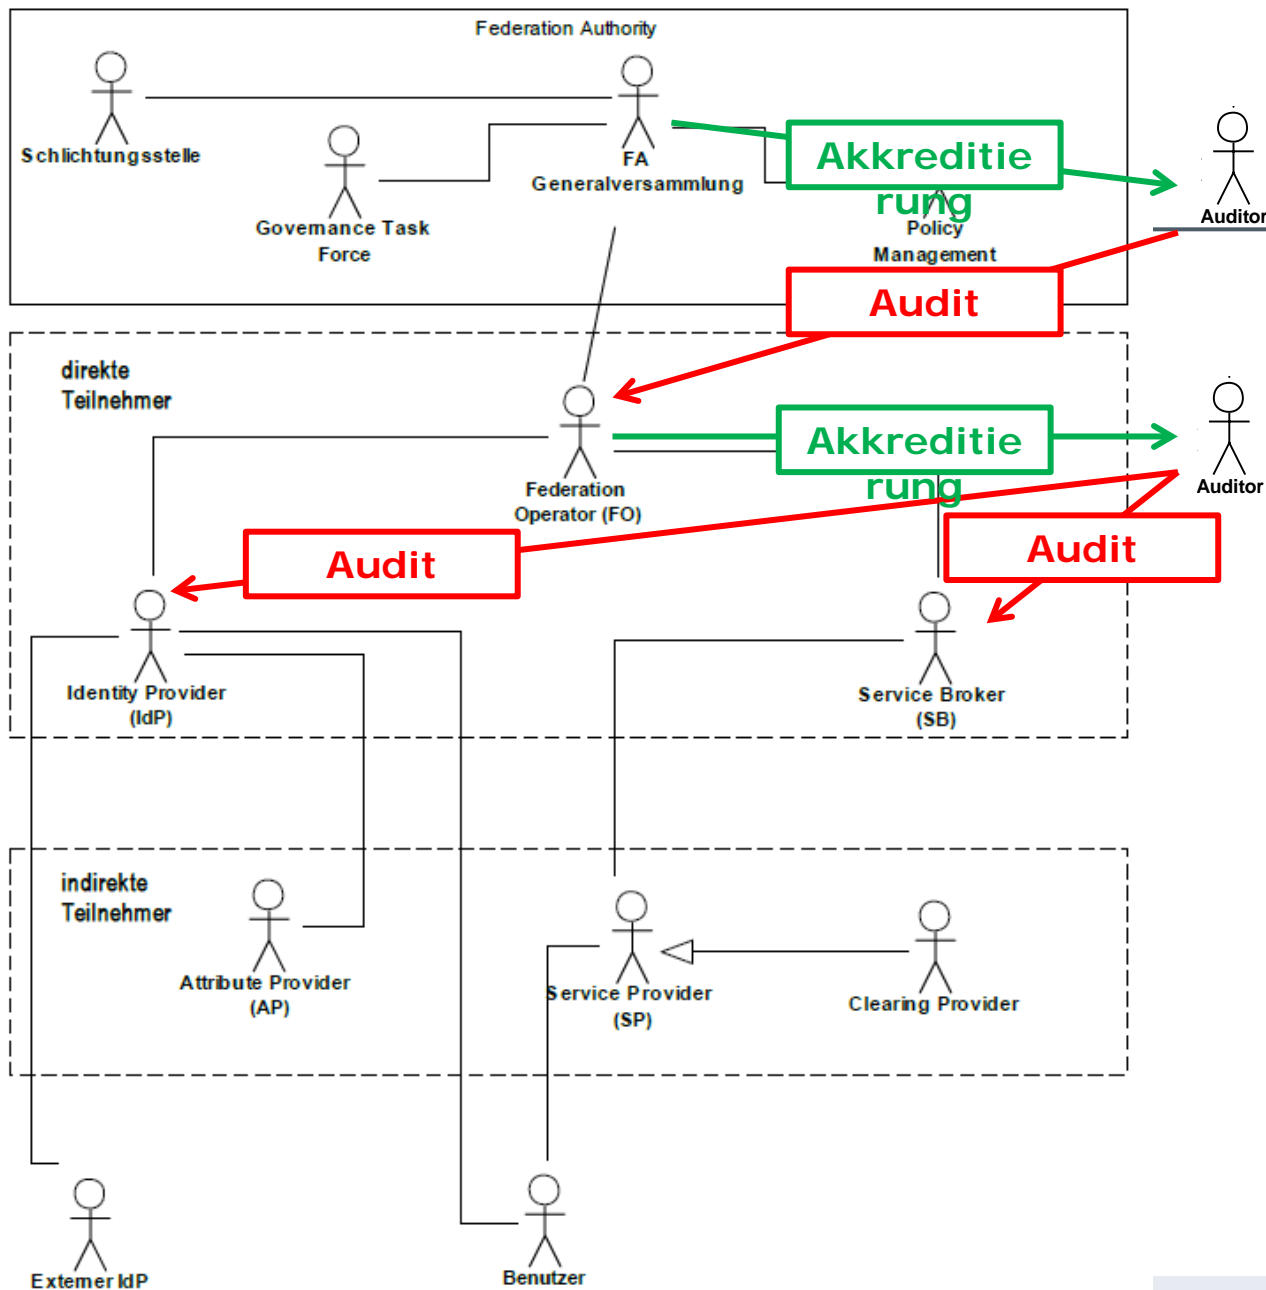

Thank you for your attention!

- More aspects during the discussion....

Accreditation

- Federation Authority opens accounts for:
 - Identity Provider
 - Service Broker
 - Federation Operator
- Federation Operator opens accounts for:
 - Service Provider

- iterative auditing
- Arbitration
- Sanctions up to ending of membership in Federation
