

some thoughts

"I AM" AN EIDAS QTSP

/ i am not representing the EU Commission
/ i do not issue QWAC

TAKE A HOLISTIC VIEW

/ it is important to take all aspects into account

NEED FOR COLLABORATION

/ strengths, gaps and challenges
/ work has just begun

ESTABLISHING TRUST

/ requires a transparent framework
/ demands security, liability and governance
and an effective lifecycle management

FOCUS ON THE USER

- / give a framework users can rely on
- / make it easy, simple to understand
- / provide transparency and liability

digital signing, simple as that.
